

Providing life-saving community care.

Dear Friend,

When you hear the sirens of an ambulance and see its lights, you might think about the person inside receiving urgent medical care on the way to the hospital. You think about the trained providers doing everything they can to give that person the best possible outcome. You may even think about how grateful you are that you are not the one in that ambulance today.

You probably don't think about where that ambulance came from, or question if it would always be there for the next emergency. However, despite the critical need, you may be surprised to learn that state policy **does not require EMS to be funded like other essential services.**

Lancaster EMS is not affiliated with or funded by any hospitals or any local, municipal, county, or state government. This means that we do not receive **any direct tax dollars.** Instead, municipalities and townships in Lancaster County have the option to voluntarily provide funds in response to Lancaster EMS requests for support. In 2024, our local townships and municipalities only met **49%** of the support requested (covering just 2% of expenses).

As a **501(c)(3) nonprofit organization**, our funding relies heavily on membership subscriptions and generous donations from **supporters like you.**
